

## Stock Predictor

The tool is based on a user-friendly interface, and it incorporates a library of historical data, which is continuously being updated. The application enables you to both execute technical strategies and create stock and ETF trading systems. In the market's case, there is the choice of between Yahoo and Google. The tool provides you with plenty of market-related information, along with the capability of choosing charts, indicators, and strategies and, when it comes to technical trading, you have the option of using any one of them simultaneously. For example, there is the option of selecting between three types of data-displaying charts, i.e. standard, high/low/close, and CandleStick. Additionally, you can opt for the market oscillation indicators volume, RSI, Fast Stochastic, Slow Stochastic, MACD, Moving Average Oscillator, Williams %R, Accumulation/Distribution, On Balance Volume, Directional Movement Index, and Chaikin Oscillator. As for analyzing and predictions, the application can check your investment strategies and their performance, while enabling you to conduct regular checkups and optimize your strategy. The program is also packed with advanced features that enable strategy creation and optimization, as well as the possibility to give you recommendations based on the market's state. Now, let us discuss the app's features and capabilities. Features and Capabilities: The tool offers you several market-related features that allow you to conduct strategy creation and optimization. For example, there is the option of conducting regular checkups of your investment strategies and how they performed in the past. If you want, you can choose between two charting options, i.e. between standard and CandleStick charts. In addition to that, you can choose between three types of indicators, i.e. between volume, RSI, Fast Stochastic, Slow Stochastic, MACD, Moving Average Oscillator, Williams %R, Accumulation/Distribution, On Balance Volume, Directional Movement Index, and Chaikin Oscillator. Also, the tool has the capability of analyzing and predicting the market, enabling you to conduct regular checkups and optimize your strategy. When it comes to analysis and predictions, you can take advantage of advanced features that will help you determine how a particular industry performed, and you can further optimize your strategy based on the information. Beside this, the program also enables you to import and export your information,

## What's New In Stock Predictor?

Stock Predictor is the most comprehensive app in the world for computer-based stock market analysis and trading strategies. It combines the full spectrum of stock market analysis tools and needed digital techniques, for creating coherent and accurate investment action plans and strategies. Getting started with this application and how to tackle the stock market Stock Predictor is a perfect tool for both beginners and advanced traders. When it comes to analysis and creating technical strategies, the tool is extremely resourceful and offers you plenty of options for understanding and putting the knowledge you acquired into context. What does this mean? You can cautiously investigate all the trends and details of individual assets, and also analyze the macros of different industries. The program allows you to pick your information source (between Yahoo Finance and Google), add new instruments and load historic data about them, create separate lists, check two charts in parallel (for identifying different patterns), alternate chart types, select the desired price indicators, import and export company information, or export trading history and strategy performance reports. Creating simple or combined trading strategies, plus charting options When it comes to the charts you have available within the menu of Stock Predictor, there is a great deal of diversity you can enjoy. For example, the app enables access to three data-displaying options — standard, high/low/close, and CandleStick. Also, when it comes to market oscillation indicators, you can opt for volume, RSI, Fast Stochastic, Slow Stochastic, MACD, Moving Average Oscillator, Williams %R, Accumulation/Distribution, On Balance Volume, Directional Movement Index, and Chaikin Oscillator. Regarding analysis and predictions, Stock Predictor can conduct regular checkups of your investment strategies and how they performed in the past; this is applicable for both manual and automated strategies. Moreover, the tool is also packed with advanced features that enable strategy creation and optimization, as well as the possibility to give you recommendations based on the market's state — to buy, hold, avoid, or sell. Best free apps of the week:.... An iPhone app with a large and beautiful chart (up to 1600 x 1200 pixels) can be very useful for stock market analysis. The app displays intraday stock charts and allows you to zoom in to a particular area on the chart. The free version of GDT Interactive Chart lets you create and edit charts, but it does not give you the option to customize the chart data. Description: An iPhone app with a large and beautiful chart (up to 1600 x 1200 pixels) can be very useful for stock market analysis. The app displays intraday stock charts and allows you to zoom in to a particular area on the chart. The free version of GDT Interactive Chart lets you create and edit charts, but it does not give you the option to customize the chart data.
